**DETAILED ACTION**

***Response to Amendment***

1. The amendments filed on 6/18/07, 7/30/07, 8/20/07 and 5/8/08 have been received and made of record. As requested, the specification and claims 1-7 have been amended.
2. Claims 1-7 are pending in the instant application.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. More specifically, the recitation "...permanently secured..." is not supported by the original specification since the claim now reads that the interdigitating straps are permanently secured to the central body portion.

5. Dependent claims 2-7 are necessarily objected as being dependent upon a rejected base claim

***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. As regards claim 1, the trademark Velcro used in the claim is indefinite since it is used to describe a particular product or material (see MPEP 2173.05 (u). Applicant is advised to use the generic wording such as hook and loop material.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure in that they show interconnected straps.

9. Applicant is advised to connect the examiner for a personal interview to discuss the writing of claims which patentably define over the prior art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim M. Lewis whose telephone number is (571) 272-4796. The examiner can normally be reached on Wednesday to Friday, from 5:30 am to 4:00 pm.
